## Test Report

Consigner

SHENZHEN WOER HEAT-SHRINKABLE MATERIAL CO., LTD.

Wall Industrial Park, Lanjing North Road, Longtian Street, Pingshan District, SHENZHEN

Sample Name Copper Connecting Terminal

Type and Size DTM-120mm<sup>2</sup>

Kind of test Type test

Sample Received Date December 26th, 2019

Test Duration December 26th, 2019 – June 3rd, 2020

Test Conclusion

1. The samples have been subjected to the series tests in accordance with GB/T 9327—2008. The results comply with the type tests requirements (Class A) of GB/T 9327—2008.
2. The surface and dimension of the sample has been tested according to GB/T 14315—2008. The results comply with the requirements of GB/T 14315—2008.

Source	Sent by the consigner
Status	Normal appearance

## 2 Testing and Verdict Standards

### 2.1 Testing Standards

- 1) GB/T 9327—2008 Compression and mechanical connectors for power cables for rated voltages up to 35kV ( $U_m=40.5kV$ ) — Test methods and requirements
- 2) GB/T 14315—2008 Compression type terminal lugs and ferrules with copper or aluminum for power cables conductors

### 2.2 Verdict Standards

- 1) GB/T 9327—2008 Compression and mechanical connectors for power cables for rated voltages up to 35kV ( $U_m=40.5kV$ ) — Test methods and requirements
- 2) GB/T 14315—2008 Compression type terminal lugs and ferrules with copper or aluminum for power cables conductors

### 3 Other Information

#### 3.1 Description of the testing party

This report is the English version of test report of TN20-1600, the Chinese version shall prevail if any inconsistencies between Chinese version and English version.

#### 3.2 Illustration

- 1) The sample's name, type and manufacturer are provided by the consigner.
- 2) The connecting terminals are tested altogether, including the cylinder part and the connecting plate.
- 3) The short-circuit test is subcontracted, because this test is not included in our testing scope approved by CNAS and CMA. The subcontractor is Machinery Industry High-voltage Transmission and Distribution Equipment Quality Inspection & Testing Center. The certificate number of CNAS for the center is CNAS L2550 and the qualification certificate number of CMA for the center is 160008223396, the short-circuit test report number is No.20200058B.
- 4) The short-circuit test was carried out with Sample No. CN19-4677 at the same time.

#### 3.3 Testing Location

The following testing items are tested at No.458, Haixiang Road, Fengxian Area, Shanghai, China, except the subcontracted testing item.

- Heat cycle tests and electrical resistance measurements in electrical test;
- Surface and dimension check.

#### 3.4 Symbol definition

Requirement: / not required by standard

Verdict: P complying with requirement/Pass

F not complying with requirement/Fail

N not required

#### 4.1.2 The 1st heat cycle test

According to GB/T 9327—2008, clause 6.3.1.

Test method: GB/T 9327—2008, clause 6.3.1

Test parameters

Ambient temperature: 16 °C

Required reference conductor temperature (°C)	Reference conductor temperature (°C)	Heat current for steady reference conductor temperature (A)	Median connecting terminal temperature (°C)
120~140	120	582	111

Test Results	The test is finished successfully. The 1st heat cycle temperature curve is shown in Figure 1.

#### 4.1.3 The 2nd heat cycle test

According to GB/T 9327—2008, clause 6.3.2.

Test method: GB/T 9327—2008, clause 6.3.2

Test parameters

Ambient temperature: 16 °C

Required reference conductor steady temperature (°C)	Heat current for steady reference conductor temperature (A)	Reference conductor temperature (°C)	Median connecting terminal		Heat cycle time

#### 4.2 Mechanical test

According to GB/T 9327—2008 clause 7.

Test method: GB/T 9327—2008, clause 7.1

##### Test parameters

Total tensile force: 7200 N  
Load rate: ≤10 N/(s·mm<sup>2</sup>)  
Duration: 1 min

Test Item	Requirement	Test Result	Verdict
Mechanical tests	No slipping shall occur during the last minute of the test.	There is no slipping for the 3 samples in the tests.	P

### 4.3 Surface and dimension check

#### 4.3.1 Surface check

According to GB/T 14315—2008 Table 10, No.1.

Test method: GB/T 14315—2008, Table 10

Test parameter

Ambient temperature: 18 °C

Test Item	Requirement	Test Result	Verdict
Surface check	Sample surface shall be bright, clean and smooth. There shall be no burr formation, crack, sharp edge, overlap, the plate shall be smooth. The cladding layer shall be well-distributed, no desquamated. There shall be no sharp angle and edge roll on the compression cylinder part of the terminal.	By visual checking, the surface is smooth, there is no burr, or crack, or sharp edge, or overlap. The cladding layer is no desquamated. There is no sharp angle, or edge roll on the compression cylinder part.	N

#### 4.3.2 Dimension check

According to GB/T 14315—2008 Table 10, No.2.

Test method: GB/T 14315—2008, Table 10

Test parameter

Ambient temperature: 23 °C
